## PROFESSIONAL EXPERIENCE

---

### Geiger

**Senior Software Engineer**  
**Application Developer**

**Lewiston, ME**  
**2020-Present**  
**2015-2020**

- Reengineered the production deployment process as lead developer on the company's Order Management system after only one year of experience, resulting in a 30% reduction in downtime and improved end user experiences
- Excelled in development and teamwork resulting in a promotion to Senior level Engineer
- Implemented legacy code base overhaul to fix known errors that caused daily work stoppages, completely eliminating the daily issues
- Trained DevOps skills to reduce lead times for servers requests from upwards of 2 weeks down to as little as a day
- Placed on a team of the top developers at the company to design and build a customizable ecommerce platform for half the cost and time attempted by an outside firm
- Lead developer on Order Management System replacement, designing architecture and UI/UX to eliminate current pain points to increase user productivity

**Martin's Point Health Care**  
**IT Intern**

**Portland, ME**  
**2013-2014**

- Wrote unit tests for a critical search engine in development creating guidelines for the developers.
- Performed bug fixes on a legacy internal web based application
- Displayed versatility by working with every team in the department, resulting in a comprehensive understanding of various workflows, processes, and team dynamics
- Assigned and distributed multi factor authentication tokens to company employees
- Deployed USB restriction policies to cloud based desktops on the company network
- Completed 100% of CodingBat's Java code practice course improving programming skills
- Thoroughly covered the Director of IT Infrastructure's office in Tinfoil causing a 150% increase in moral and fun
- Strengthened markup skills by implementing hundreds of new designs for HTML based customer facing documents
